

JC METALWORKS LIMITED
ENVIRONMENTAL POLICY STATEMENT

To fulfil our commitment to the environment, the company will administer, maintain and improve an environmental management system in accordance with ISO 14001:2015. It is our policy to:

Adopt, and aim to apply the principles of “sustainable development” – accomplishing our strategic growth and development without undermining the integrity and stability of the natural systems

Seek to continually improve its environmental performance whilst reducing any negative impact upon the environment.

Foster the commitment of all personnel towards protecting the environment and improving the environmental performance of the business.

Monitor and comply with all applicable environmental compliance obligations.

Diligently undertake our duty of care with regards to waste disposal, and to apply the waste hierarchy wherever practicable.

Aim to minimise waste through the optimisation of processes and effective utilisation of materials, utilities and energy.

Encourage and promote similar environmental standards with all external providers to our business – suppliers, vendors, and contractors.

Include environmental considerations from a life-cycle perspective throughout the relevant functions, activities and departments during product/service realisation.

Assist in developing economically viable solutions to environmental problems in our industry.

Signed:

Managing Director

Nick Oakland
